

Environmental Policy Statement

EBOP Business and Leisure Show is conscious of the effect its operations could have on the environment through noise pollution and the disposal of waste materials.

We aim to proactively eliminate environmental pollution and harm.

We will achieve these high standards with enthusiastic involvement of all staff members and management by:

- Adoption of a professional and responsible approach
- Meeting requirements of the local authorities
- The reporting and investigation of all environmental incidents and accidents
- Reporting to the principal or relevant authorities of any environmental incidents and accidents
- Compliance to site regulations, statutory acts and regulations
- Using recycling activities for waste oils, solvents, packaging, general waste, wire and steel

This policy statement shall be displayed at all EBOP Business and Leisure Show workplaces. We will review this policy periodically so it remains relevant to the needs of EBOP Business and Leisure Show. This policy is to be communicated to all staff, contractors/sub-contractors, suppliers and visitors on all sites.

The Committee endorses this policy to confirm his personal commitment in maintaining a zero effect on the environment.
